Hrithik Apsingekar

Software Developer

+91 93568 01456 | apsingekarhrithik@gmail.com | LinkedIn Profile

PROFESSIONAL SUMMARY

Software Developer with 1.4+ years of professional experience developing and maintaining web and desktop applications using C#, .NET Framework, ASP.NET MVC, ADO.NET, Entity Framework, LINQ, and Microsoft SQL Server. Experienced in building modular architectures, implementing CRUD operations, designing relational databases, authoring stored procedures, and integrating responsive UIs with backend services. Strong understanding of OOP principles, RBAC, data validation, and debugging. Contributed to Housing Society Management, Matrimony, and Document Management domains. Skilled in HTML5, CSS3, Bootstrap, JavaScript, IIS hosting, and production maintenance.

TECHNICAL SKILLS

- **Programming Languages:** C#, SQL, JavaScript, HTML5, CSS3
- **.NET Technologies:** .NET Framework, ASP.NET MVC, ADO.NET, Entity Framework, LINQ, Windows Forms (WinForms)
- **Database Technologies:** Microsoft SQL Server, SSMS, Stored Procedures, Views, Joins, Indexes, FILESTREAM
- **Web Technologies:** Bootstrap, Responsive Web Design, Form Validation, AJAX (where applicable)
- **Security & Architecture:** Authentication, Role-Based Access Control (RBAC), Data Validation, CRUD Operations, Debugging
- **Deployment & Tools:** Internet Information Services (IIS), Visual Studio

PROFESSIONAL EXPERIENCE

Software Programmer **2025 – Present**

Tweak Software and Solution

ROLES AND RESPONSIBILITIES

- Participate across all phases of the SDLC, including requirements gathering, architecture design, development, and unit testing.
- Build and maintain full-stack web applications using C#, ASP.NET MVC, Razor view engine, and .NET Framework in an N-tier setup.
- Develop responsive user interfaces using HTML5, CSS3, and Bootstrap, integrating asynchronous jQuery AJAX calls for partial rendering.
- Implement strongly typed Views, ViewModels, and custom HTML Helpers to isolate domain models and ensure compile-time type safety.
- Engineer desktop solutions using C# WinForms and ADO.NET, utilizing background threading models to ensure non-blocking UI responsiveness.
- Design and optimize normalized relational schemas (3NF) in MS SQL Server, managing keys, constraints, and index strategies.
- Author high-performance T-SQL stored procedures, views, UDFs, and CTEs for core transactional and reporting modules.
- Implement data-access logic via ADO.NET and Entity Framework, writing optimized LINQ queries with eager loading (`.Include`) to prevent N+1 issues.
- Enforce transaction management and ACID compliance using explicit database transactions (`SqlTransaction`) during multi-step writes.
- Implement Role-Based Access Control (RBAC), Forms Authentication, and session state lifecycles to protect sensitive controllers and views.
- Fortify endpoints against web security threats, including SQL Injection (parameterization), XSS (Razor encoding), and CSRF (AntiForgeryToken).
- Build custom action filters and global exception-handling pipelines in `Global.asax` and `FilterConfig` for centralized logging and trapping.

PROJECT EXPERIENCE

T HomeConnect – Housing Society Management System *ASP.NET MVC, C#, SQL Server, Bootstrap*

- Contribute to the development of housing society modules, including member directory, amenity booking, and maintenance billing.
- Develop application functionality for managing society records and processing resident requests.
- Design and maintain SQL Server tables, queries, and stored procedures supporting core society workflows.
- Build responsive user interfaces using HTML5, CSS3, and Bootstrap integrated into ASP.NET MVC views.
- Implement data validation and role-based access control rules matching administrative security requirements.

Tweak Vivah Setu – Matrimony Portal *ASP.NET MVC, C#, Entity Framework, LINQ*

- Develop matchmaking features including user profile management, activity dashboards, and partner discovery filters.
- Implement multi-criteria search functionality using LINQ-to-Entities and Entity Framework.
- Integrate frontend user workflows with relational database procedures for profile creation, verification, and updates.
- Design mobile-first responsive screens to improve usability across all handheld devices and desktop browsers.

DMS WinForms – Document Management System *C# WinForms, ADO.NET, SQL Server*

- Develop desktop application modules for electronic document indexing, archiving, and administrative workflows.
- Implement secure login authentication, custom navigation panels, and meeting management interfaces.
- Integrate WinForms interfaces with SQL Server databases via asynchronous ADO.NET pipelines.
- Implement granular role-based permissions to safeguard sensitive document records and restrict access.

EDUCATION

Bachelor of Computer Applications (BCA)
